

DVS[®]-EWF – European
Adhesive Bonder – EAB

DVS[®]-EWF – European
Adhesive Specialist – EAS

For a long time, the Adhesive Bonding Technology has become an important and acknowledged sector in the field of jointing technology. New materials and bonding techniques will determine this development

Professional advice on adhesives and the selection of suitable products require a profound knowledge about current and future developments. For this reason, certified training seminars and follow-up courses for our employees are an important and imperative part of our company philosophy at WEICON.

In this area, we have been working closely and for many years with the renowned Fraunhofer Institute for Manufacturing Technology and Applied Materials Research (IFAM) in the city of Bremen/Germany.

The Department Adhesive Bonding Technology and Surfaces at IFAM has been acknowledged internationally through DVS-PersZert[®] as an accredited certification body for the qualification of human resource in the field of bonding technology according to DIN EN ISO/IEC 17024.

Since 1995, more than half of all WEICON employees have been trained and certified at the IFAM in Bremen as

DVS[®]-EWF – European
Adhesive Bonder – EAB

or

DVS[®]-EWF – European
Adhesive Specialist – EAS

Ralph Weidling (Managing Director of WEICON) and Prof. Dr. Andreas Groß (Director Department Adhesive Bonding Technology IFAM Bremen) and part of the sales staff of WEICON during a seminar on adhesives technology at the premises of WEICON.
